

[Total No. of Questions: 09]

[Total No. of Pages:]

Uni. Roll No.

Program: B.Tech IT

Semester: 3

Name of Subject: Object Oriented Programming using C++

Subject Code: PCIT-102

Paper ID: 16041

Time Allowed: 02 Hours

Max. Marks: 60

NOTE:

1. Each question is of 10 marks.
2. Attempt any six questions out of nine
3. Any missing data may be assumed appropriately

17-01-2022(M)

1. Explain call by reference and call by value with example. Write a Program to swap numbers in cyclic order using call by reference
2. List out visibility of inherited members in various categories of inheritance.
3. Write a Program to add two matrix using multidimensional arrays.
4. List out various situations for execution of base class constructor in inheritance.
5. What is Buffer? How does it affect programming? Give example.
6. Write a Program to print Floyd's triangle.
7. Illustrate program to remove all characters in a string except alphabets
8. Demonstrate by writing a program to sort elements in a lexicographical order (dictionary order)
9. Write a program to find the factorial of a given number
